Advanced Development Economics – Selected Topics, Summer- 2017

An Outline

Prof. Sugata Marjit

The purpose of this course is to provide a rigorous introduction to certain key factors, historical as well as emerging, that have shaped the general economic and social landscape of the developing world since 1950s. While our main focus will be the set of factors that determine growth and prosperity of the economically disadvantaged, we shall reflect on broader aspects of Development beyond Economic Growth, which deals with poverty and inequality, education, health etc. Our method will be essentially analytical with strong emphasis on theoretical mechanisms and relevant empirical findings. We shall draw from important texts and papers and restructure materials to fit the course requirement. The list of topics we shall cover in this course are as follows.

2. Economic Growth under Ideal and Non-Ideal Conditions (Lecture 2)
3. Convergence, Divergence and Poverty Traps – Role of Imperfect Credit Market (lecture 2 and 3)
4. Behavioural Complexities – Status Effect, Growth and Malnutrition (Lecture 3)
5. Labour Market Issues – Rural-Urban Migration, Informal Sector, Efficiency Wage Hypothesis (Lecture 4 and 5)
6. Open Economy Issues - Trade and Growth, Openness and Inequality (Lecture 5 and 6)
7. Political Economy Perspective – Growth vs. Redistribution, Economic Reform, Corruption and Growth (Lecture 6 and 7)
9. Paper Presentations (9 and 10)

Following are some of the resources we will use along with the lecture notes. General
